

**Quality  
Healthcare  
Anywhere.  
Delivered  
On Demand.**

### **Breaking the Boundaries of Traditional Care**

With the ability to deploy a medical office in less than 2 minutes, MobileDoc is the ultimate portable practice. Revolutionary in its compact and mobile design, MobileDoc integrates best-in-class professional medical-grade devices with state-of-the-art HD video and EHR connectivity. Physicians can provide care remotely that is on par with an in-person visit, including conducting basic exams, checking vitals, and performing specialty testing—breaking the boundaries of traditional care.

### **Mobilizing Care to Expand Physician Reach**

Traditional providers struggle with the inefficiency of traveling to the patient and high cost of the physician's time. While the need for quality care outside of the office is growing, the high cost of non-clinical activities makes the model a challenge. MobileDoc enables providers to deliver exceptional care anywhere, conducted remotely by physicians with the help of lower cost onsite extenders—increasing the scope of clinical services delivered, broadening patient reach, and advancing the traditional model.

### **Reducing Cost While Delivering Personalized Care**

MobileDoc makes quality care more accessible to patient populations who currently require costly modes of care, as well as patients who demand convenience without compromising the quality of care received. MobileDoc solves this challenge, not only for disabled, elderly and homebound patients, but it can also reduce ER visits and meet today's growing demand for onsite health and concierge medicine.

# Making Great Care More Mobile Than Ever

## REMOTE PHYSICIAN CAN OPERATE AND CONDUCT EXAMINATION WITH A STANDARD LAPTOP OR TABLET

and free Google Chrome browser.

**INSTANT COORDINATION ACROSS THE PATIENT'S CARE TEAM** with real-time data polling and live streaming of medical device output—including store and forward capabilities

**ENHANCED DIAGNOSTIC CAPABILITY** enabled with medical devices controlled by the remote physician

**CLINICAL ACCURACY** using multi-channel audio and visual capabilities

**FOCUSED LISTENING** utilizing remote stethoscope audio visualization and filtering

**PLUG AND PLAY CONNECTIVITY** to a wide array of clinical and diagnostic devices

**SEAMLESS BI-DIRECTIONAL EHR INTEGRATION CAPABILITY** to efficiently capture and transmit patient information

**INTEGRATED MEDICAL TRANSLATION AND INTERPRETATION** of 250 languages including ASL

**REDUCED PAPER FORMS AND FASTER INTAKE** with patient check-in software including insurance eligibility verification and 256-bit encrypted payment

**MEDPOD IS A MEDICAL DEVICE DATA SYSTEM LISTED WITH THE FDA** allowing for electronic transfer, display, storage, and conversion of data format for connected medical devices

## Exceptional Physician Care Anywhere

- **Innovative, compact, go-anywhere design\***
- **Deployable in less than 2 minutes**
- **Enables physicians or provider organizations to deliver quality care in non-traditional settings, such as the home or the office**
