

Improving Diagnosis of Skin Conditions

WITH VISUALDX USING APPLE CORE ML

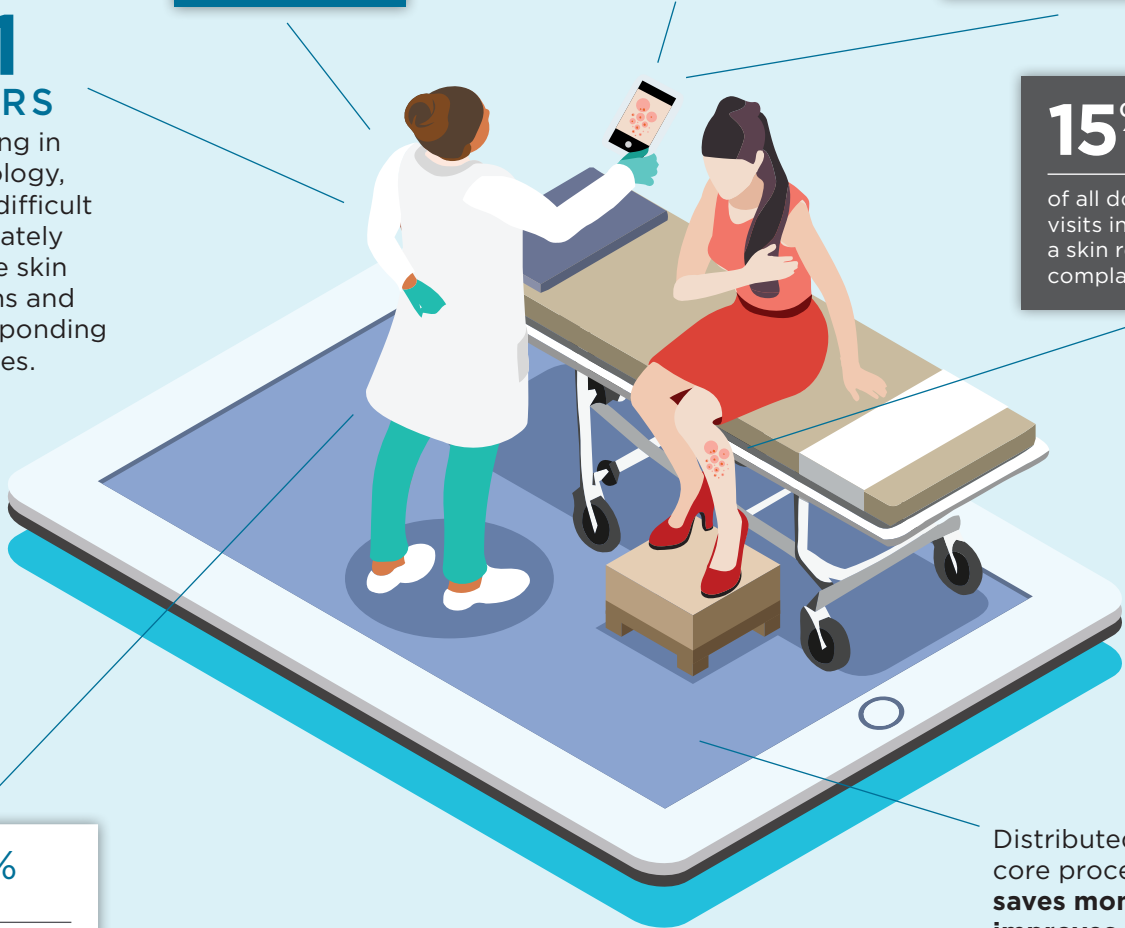

Over
65%
of skin conditions are seen by non-dermatologists

48%
of non-dermatologists misdiagnose skin conditions

CORE ML PROTECTS PRIVACY. Photo is only stored in physician's phone memory. VisualDx never receives it.

15%
of all doctor visits include a skin related complaint

Generalists receive an average of
21 HOURS
of training in dermatology, making it difficult to accurately diagnose skin conditions and their corresponding illnesses.

50%
use VisualDx on a mobile device

VISUALDX PHYSICIANS

80%
use Apple iPhone or iPad

20%
use Android

Distributed core processing **saves money, improves speed and accuracy** of diagnosis.

“Nearly every person will experience a diagnostic error in their lifetime.”

INSTITUTE OF MEDICINE SEPT 2015
