Telemedicine...Evolved

Medpod has created an optimal experience for both providers and patients. Combining form and function, the MCT Medical Cart enables providers to deliver comprehensive care anytime, anywhere. From basic exams and vitals to specialty testing, the MCT Medical Cart comes fully equipped to deliver primary care functions and can be outfitted to manage advanced specialty care as well.

Real Time Diagnostic Images and Clinical Data Capture

Medpod's cloud-based software fully automates the collection of all data and images from diagnostic devices on the MCT Medical Cart and transmits this information to the physician and populates the information into the practice's EHR in real time.

Optimize Productivity and Load Balancing

The MCT Medical Cart can be called upon anytime to support and enhance daily in-office logistics. Whether to optimize productivity by utilizing idle or remote staff during high-volume periods or to reach low-density populations to deliver world-class medical care, the MCT Medical Cart provides the flexibility and capabilities to deliver that care while providing a high return on your investment.

The Engine That Powers Performance

Live audio, data and video streaming. Real-time integration into EHR.

INSTANT COORDINATION ACROSS THE PATIENT'S CARE TEAM with real time data polling and live streaming of medical device output — not store and forward

ENHANCED DIAGNOSTIC CAPABILITY with medical devices controlled by the remote physician

CLINICAL ACCURACY using multi-channel audio and visual capabilities

FOCUSED LISTENING utilizing remote stethoscope audio visualization and filtering

PLUG AND PLAY CONNECTIVITY to a wide array of clinical and diagnostic devices

SEAMLESS BI-DIRECTIONAL EHR INTEGRATION CAPABILITY to efficiently capture and transmit patient information

INTEGRATED MEDICAL TRANSLATION AND INTERPRETATION of 250 languages including ASL

REDUCED PAPER FORMS AND FASTER INTAKE with patient check-in software including insurance eligibility verification and 256-bit encrypted payment

MEDPOD IS A MEDICAL DEVICE DATA SYSTEM LISTED WITH THE FDA allowing for electronic transfer, display, storage and conversion of data format for connected medical devices

Easy to Implement

- Medpod integrates into existing work flows
- Turnkey, cloud-based infrastructure
- Supports bring your own device (BYOD) for remote connectivity

Enhanced Clinical Examination Capabilities

Best-in-class devices. Controlled by the remote physician.

Medpod partners with the leading manufacturers to bring you best-in-class devices and equipment. The various MCT Medical Cart configurations can measure basic vitals, as well as enable the delivery of advanced specialty diagnostics. This one-of-a-kind platform empowers healthcare practitioners and provider organizations to wholly transform how they provide care.

Drives Efficiencies

The MCT Medical Cart can be operated by any clinician, such as a nurse or medical technician.

The primary or specialty practitioner consults directly with the patient from a remote location and maintains control of the devices and tests being administered.

TYPICAL USE CASES:

- Extending practice reach
- Health Professional Shortage Areas (HPSAs)
- Hub and spoke operations
- Healthcare microsite
- Resource load balancing
- Improving workflow
- Expanding on-site point-of-care options
- Managing work/life balance
