A-S Medication Solutions

ORTHOPEDICS

In-Office Medication Dispensing Program

Orthopedic practices frequently produce the finest and most profitable dispensing programs, more than any other specialty. Dispensing in your orthopedic practice is one of the lowest cost, highest reward services you can incorporate into your practice. Unlike purchasing new equipment or adding specialized procedures, most orthopedic practices can implement a successful dispensing program within 48 hours with an initial investment of less than \$3,000.

Whether you're building your first dispensing program or looking to advance an existing one, A-S Medication Solutions understands the needs of today's orthopedic physician. ASM will enable your practice to dispense to every level of your patient population, capturing revenue that has been traditionally referred outside the practice. Call us to learn how ASM can help you implement your dispensing program today.

- **Manage your pharmaceutical and DME inventory with our web-based dispensing software**
- **Automated controlled substance monitoring**
- **Complete formulary**
- **Increase compliance to improve outcomes**
- **Industry's most compliant and secure dispensing program**
