More than Telemedicine – Telediagnostics

FOR INBOUND PATIENT APPLICATIONS

Medpod enables high-quality, remote physician-patient encounters on par with a face-to-face visit.

- Integrated best-in-class professional medical devices enable enhanced clinical examination capabilities
- Live video, audio, clinical and lab data streaming, and remote telediagnostic device control
- Provider access through web browser — no software to install; EHR integration available
- The Medpod platform enables both fee-for-service and value-based models.

BENEFITS

Medpod enables providers to break down the barriers of traditional care delivery and create new care pathways, all while complying with federal and local law, FDA, HIPAA, and CMS mandates and guidelines.

Live Video Consults with Telediagnostics

- Acute care, sub-acute, urgent care, or ambulatory care
- Expand service offerings — specialty care and practice reach
- Hub and spoke operations
- Health care microsites — schools and worksites
- Resource load balancing

Optimize productivity and expand your practice.
