REDEFINING DIABETES CARE

GlucoMe is providing a true end-to-end digital diabetes management solution that fully connects healthcare providers with patients for effective and efficient control and remote care of diabetes populations.

TRUE END-TO-END DIABETES CARE PLATFORM

Patient

Simple pairing with 3rd-party commercial blood glucose meters: Wireless connectivity enables seamless patient data collection.

Engaging Patient Mobile App: Effective self-management for better compliance

Healthcare providers

Cloud-based Digital Diabetes Clinic & Control Tower: Enables remote patient and population data-driven prioritization and management.

GlucoMe™

EMPOWERING DIGITAL DIABETES MANAGEMENT

GlucoMe delivers a paradigm shift in managing diabetes, from restrictive point solutions to a truly connected data-driven experience. Combining timely insights with automated interventions, notifications and direct communication, GlucoMe enables large-scale, comprehensive, automated and personalized diabetes care.

Digital Personalized Treatment

Turns today's data overload into easy-to-use population and personalized management tools for care providers. The GlucoMe platform utilizes proprietary system capabilities, running advanced queries and data mining, to give care providers actionable insights to better care for their patients, while care modules deliver focus and patient prioritization.
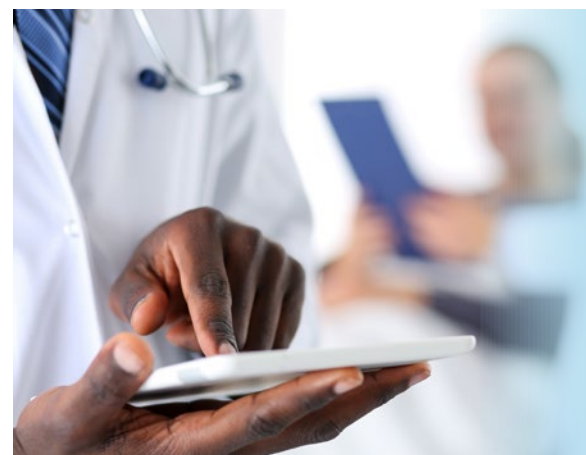

Effective Remote Care

Designed for diabetes professionals, quick digestible patient views enable care providers to rapidly prioritize, control and deliver effective remote care. Smart automated management tools further streamline resources and save time.

Easy to Implement and Scale

Customizable architecture delivers simple, quick implementation with minimal training; easy-to-use and scalable with clinic growth. While aligning with market and customer requirements. Open IoT platform easily integrates new digital health data streams.

TECHNOLOGY THAT WORKS

FDA-REGISTERED
software platform

COMPLIES
with diabetes guidelines (ADA/EASD)

STRONG OUTCOMES
74% reached post-prandial blood glucose targets

OPEN PLATFORM
integrates with 3rd-party EMRs, BGMs & systems

KNOW-HOW
Led by health-tech & diabetes experts

81% RETENTION
Patients like and use the system[1]

3X-6X COMPLIANCE
More glucose measurements per patient[2]

13X TOUCHPOINTS
Closer interaction between medical teams & patients

[1] GlucoMe Vietnam 3 months follow-up and analysis
[2] GlucoMe India 6 months follow-up and analysis
