

VITALACY

Improving the quality of care. One wash at a time.

Vitalacy is a comprehensive system for preventing infectious disease transmission. We empower healthcare professionals with technology, data, and guidance to reach compliance goals.

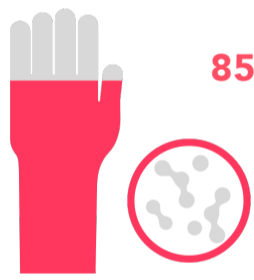

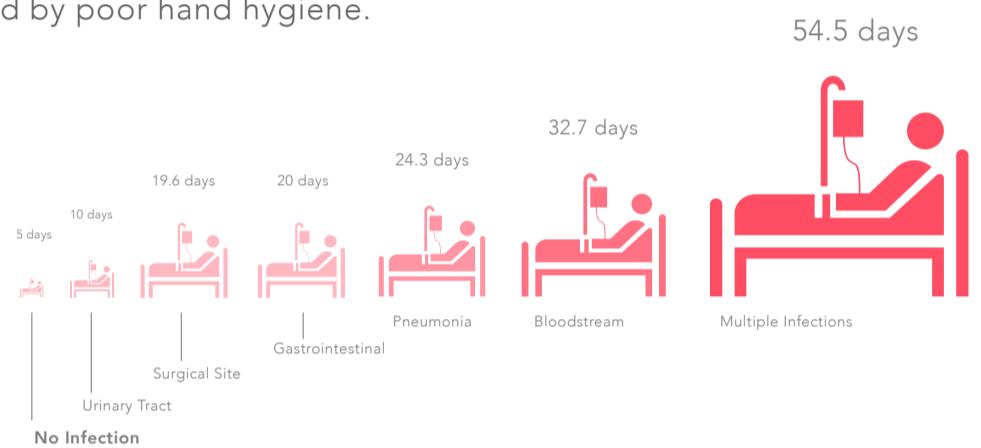

The Problem

70% of all Hospital Associated Infections (HAI) are directly caused by poor hand hygiene.

75K Americans are dying as a result of HAI every year.

\$40B Annual cost of HAI in the U.S.

Increasing length of stay is due to HAI.

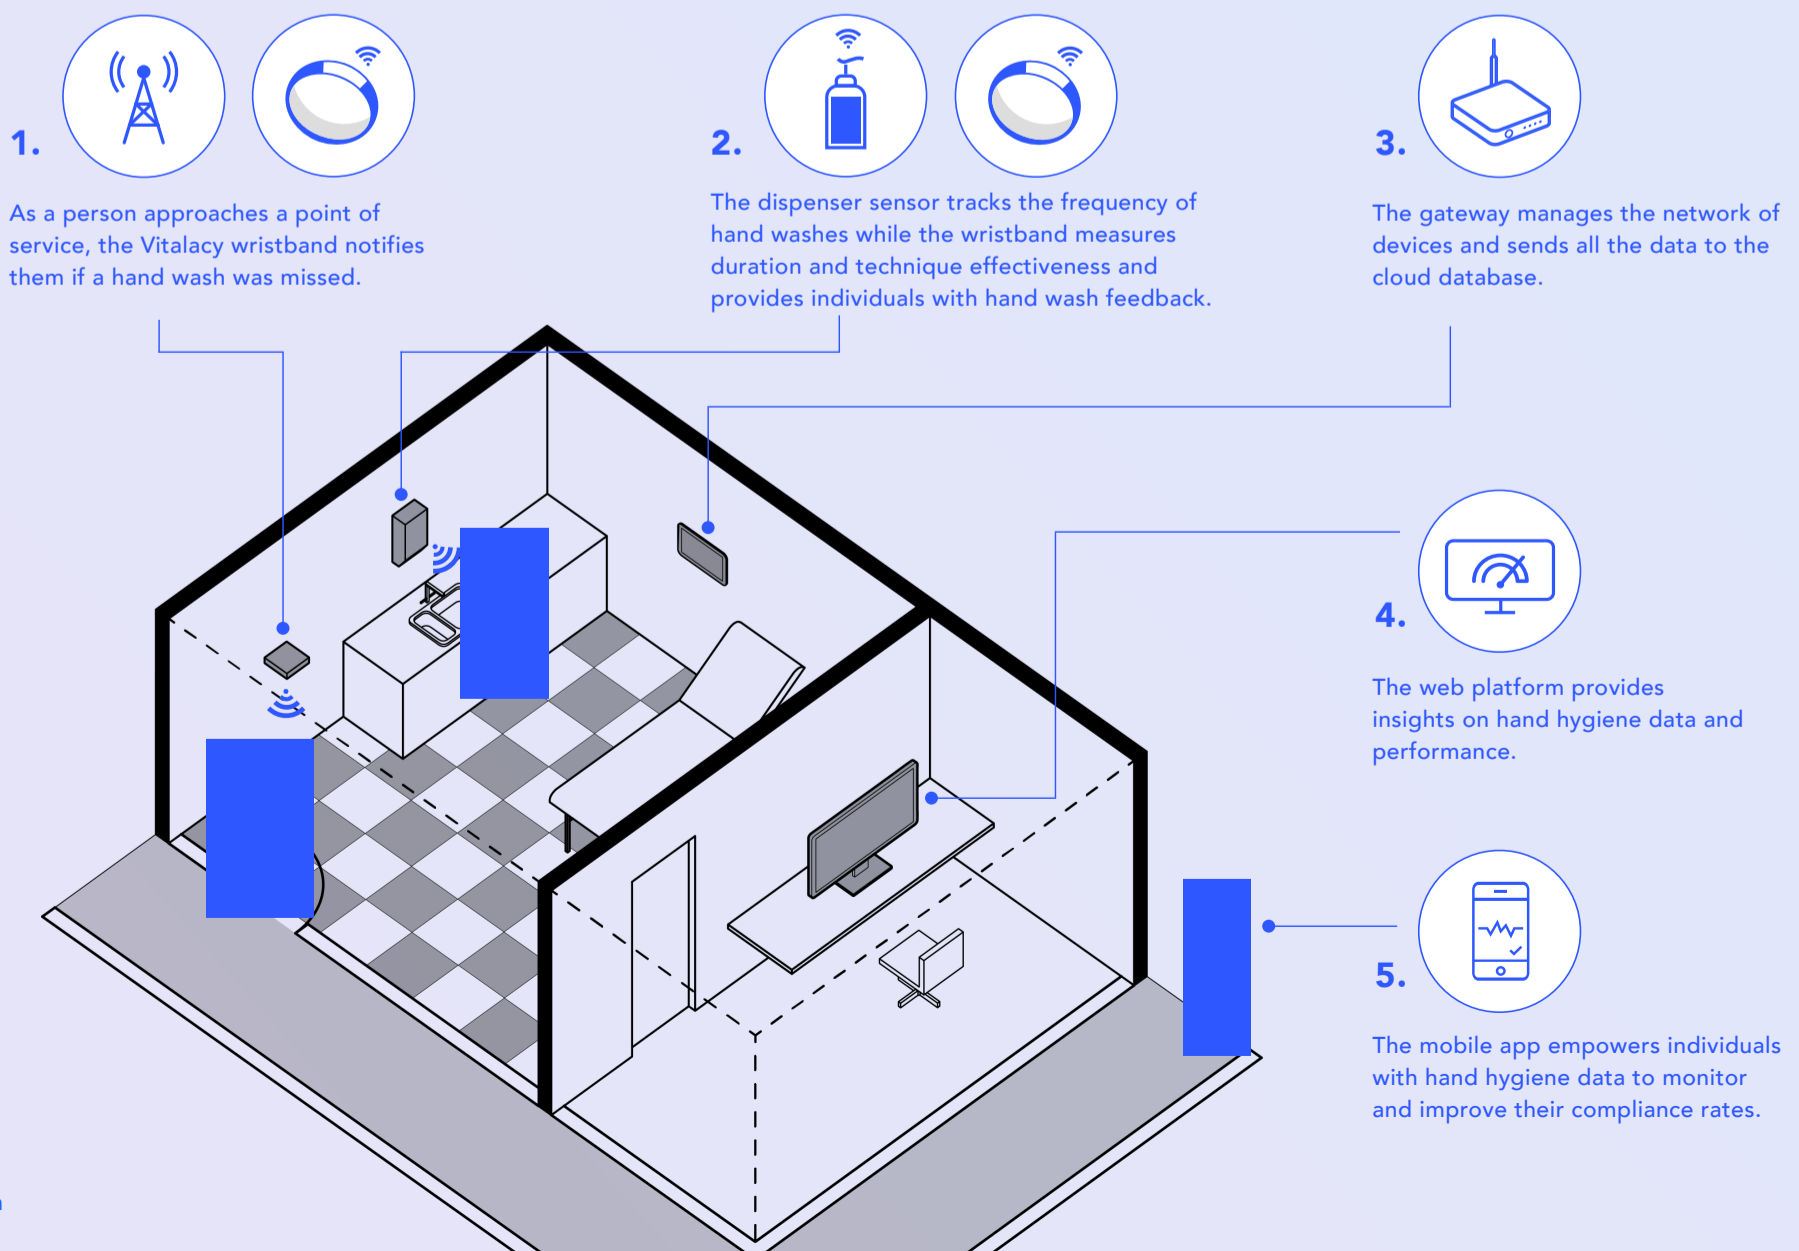

85.7% of hands were contaminated at some point during the study and

22.2% of all samples were positive for at least one of the "targeted" pathogens, including Acinetobacter baumannii, MRSA, and C. difficile.

*Based on samples take from hands of healthcare workers in a would care center

Our Solution

Providing real-time reminders for hand-washes

Monitoring quality and duration of washes

Ensuring optimal functionality of dispensers

Solution Packages

Designed for practices seeking an easy to use technology to improve patient safety and outcomes. Ideal for environments with patients prone to infections, or with caregivers exposed to biohazards.

Package 1: Smart Dispense

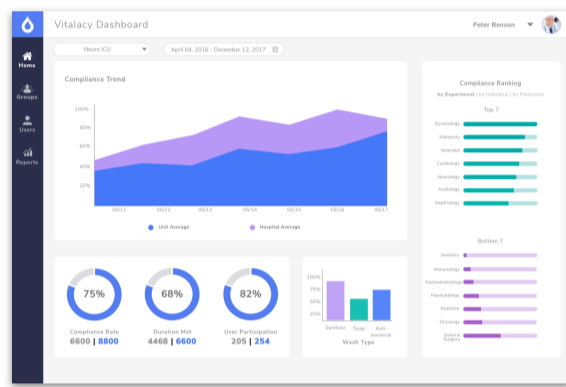

Includes:

Basic

Package 2: Individual Reporting

Includes:
