

Electronic Medical Records

Improve workflow.
Enhance Care Delivery.
Boost productivity.

Get Back to the Business of Healing.

Efficient, comprehensive and flexible electronic medical records Solution from Henry Schein MicroMD.

2015 Edition CEHRT Version 15.0

Why did you decide to become a doctor?

Odds are it wasn't so you could stare at a computer screen all day.

Thankfully, there's a comprehensive and flexible paperless solution in **MicroMD EMR**. Solo practices, large groups, and community health centers all rely on MicroMD EMR to improve workflow, enhance care delivery, and boost productivity. MicroMD EMR integrates with your practice management system to expedite care, enhance accuracy, and improve reimbursement. Available as a client-server or cloud based software, MicroMD EMR is a scalable and flexible solution that allows you to improve efficiency, maximize growth, and meet changing payment program and regulatory requirements.

Flexible

Choose the style of documentation that works for you and your personal preferences regardless of how others in the practice choose to work

Comprehensive

Access all of your patient information in one complete, easy to use paperless solution and easy document requirements for the QPP and EHR Incentive programs

Efficient

MicroMD EMR works with your office's workflow, saving you time

*MicroMD EMR is a strong program to help manage clinical functions. The customizable templates make the software easy to use without a problem. Whenever I have a question about something my support representative is always quick to respond; **their assistance and product knowledge is excellent.***

How does MicroMD EMR get you back to the business of healing?

With these outstanding features...

e-Prescribing – Improve medication safety, enhance workflow, and save time

- Real-time electronic prior authorizations (ePA) within the e-Prescribing workflow
- Two-way pharmacy communications
- Enhanced medication reconciliation
- Reduce drug abuse, drug diversion, and “doctor shopping” by legally prescribing Schedule II through V drugs electronically with MicroMD EPCS Gold
- Secure, reliable, and safe electronic prescribing of all medications

Clinical Documentation – Choose the style of documentation that works for you

- Select from one to many documentation styles, such as forms, templates, text, voice recognition or create custom workflows that match your preferred documentation style
- Add customized chart views, including data grids and graphs to the patient chart with Patient Overview
- Speed up the documentation process with pre-set responses for common conditions
- Fast access to patient histories presents you with the information necessary to provide the highest quality of care
- Patient Monitor provides an “at-a-glance” review of the patient, highlighting the areas of the chart that need provider attention and allowing for one-click navigation to those areas
- VisualDx allows providers to quickly search by diagnosis, build a patient-specific differential, or review travel or medication-related events at the point of care.

Henry Schein Secure Chart Patient Portal – Save time for both patients and office staff

- Import discrete data from the portal into the chart
- Allow patients to request and schedule appointments
- Collect patient form data online prior to service
- Easily answer patient questions in a timely manner
- Securely send records and results to your patients

Clinical Dashboard – Quickly view a patient’s most pertinent data in one place

- Create multiple templates with customized views for quick clinical data review, which are also viewable and accessible while documenting the patient's visit
- Quickly pull together all the specific data you want to see regarding a patient's condition or health status and easily create an encounter for a future date.
- One-click access to award winning VisualDx Clinical Decision Support System

Task Management – Manage your workload on your terms

- Streamline your routine tasks into an electronic to-do list with a single, structured point of access to your common work activities
- Tasks are always organized and accessible – even remotely – preventing your to-do list from becoming unmanageable
- See your patients’ necessary medical services right on your screen, allowing you to remind them of what’s due and increase patient compliance
- Track patient progress, educate patients, and promote healthy outcomes

QPP and EHR Incentive Programs

Maximize participation Functionality, features, and integrated tools to enable providers to meet ever-changing payment and incentive program requirements.

- 2015 Edition CEHRT
- Quality measures enable multi-specialty data capture, monitoring, and reporting
- Integrated ePrescribing, EPCS, portal, secure messaging, and registry reporting solutions
- Built-in security features help check boxes on security risk assessment requirements
- Access patient-specific education
- Clinical information reconciliation
- Registry interfaces
- Immunization, public health, registry, and syndromic surveillance interfaces
- Monitoring and reporting tools

We offer Cloud and standard client server solutions
