

An efficient practice is a healthy practice.

MicroMD's integrated eSERVICES are designed to increase your practice's efficiency so that you can get back to doing what you do best – healing. Our consultative approach to matching eSERVICES with clients means that we specifically assess your practice to determine which products will increase your efficiency while saving you money, resulting in negative cost. If you want a practice that runs like a well-oiled machine, don't hesitate. Start exploring our available eSERVICES today!

MicroMD eSERVICES legend

● EMR ONLY ● PM ONLY ● BOTH

-  **Dragon® Medical Practice Edition 2:** Helps ensure that clinicians document care more completely and "in their own words" within their MicroMD EMR software.
-  **Henry Schein Secure Chart Patient Portal:** Flexible, two-way patient-to-practice communications to allow medical professionals a way to interact with their patients to answer questions, collect or send information.
-  **PDR® Network Tools:** Delivers free key drug and safety information, as well as pertinent patient resources in your MicroMD EMR clinical workflow.
-  **MicroMD Interfax:** Outbound and inbound web-based fax solution that allows practices to efficiently and cost-effectively send, receive and manage electronic faxes.
-  **MicroMD EPCS Gold:** Enables prescribers to legally write prescriptions for Schedule II through V drugs to retail or mail order pharmacies electronically and access PDMP data within the same EPCS workflow.
-  **Rules-based Clinical Decision Support (CDS) powered by Persivia:** Provides both prospective and retrospective clinical decision support in the form of real-time evidence-based alerts, guidelines, protocols, and reports that help clinicians improve quality measure scores, reduce costs and improve patient care.
-  **Topaz™ eSignature Pad:** Enables paperless document creation, signing and authentication of electronic forms with digital handwritten signatures.
-  **Vivify Health:** Empowers practices to drive patient engagement and adherence to population health and chronic care management (CCM) care paths, remotely identify opportunities for timely clinical intervention, and track and report on every second spent reviewing clinical information.
-  **Hardware and Software Financing:** Assistance with software and equipment financing through Henry Schein Financial Services.
-  **Medical Guardian powered by Data Guardian Pros:** Gives your practice auditable tools for HIPAA compliance, including training, assessments, policies & procedures and 24/7 monitoring of your network.
-  **MicroMD eBackup:** Reduces risks associated with manual data backup via automated, online data backup and monitoring.

*What a lifesaver! We have had several computers crash, including our server. **It was great to be able to rely on the backups to be restored quickly and correctly.***

- Jennifer St. Cyr,
Patient Coordinator

MicroMD eSERVICES legend

● EMR ONLY ● PM ONLY ● BOTH

- 
AutoRemind: Fully automated reminders delivered directly from your appointment scheduling system via text messages, voice calls and emails.
- 
Demandforce®: Gives your practice the marketing and communications tools it needs to attract and retain patients, manage and build its online reputation, and save time.
- 
MicroMD eStatements: Offers print and electronic patient statement processing, delivery services, as well as online statement presentment and patient payments with the addition of MicroMD ePayments.
- 
MicroMD ePayments powered by Worldpay: Integrated credit and debit card payment processing allowing payment information to be automatically posted into MicroMD as well as available in patient accounts and ledgers.
- 
dashboardMD: Extracts key financial and claims data from MicroMD PM to present real-time business intelligence dashboard tools and reporting for optimizing practice performance.
- 
Preferred Clearinghouse Services: Offers practices the ability to choose from the nation's leading clearinghouse options to find a solution that meets your billing, EDI and revenue cycle management needs.
- 
MedicScan™ OCR Scanning: Eliminates the need for manual entry by simply scanning patients' driver's license and insurance card(s) to auto-populate MicroMD's demographic and insurance screens with patient's information and picture.
- 
TSI® Collections: Helps improve cash flow caused by slow paying patients or unresolved claims through the automation of pre-collections and full collection services.
- 
MicroMD Custom Reporting Options: Design, create and share your own unlimited custom reports or leave the report generation to us.
- 
Identity Guard | Data Breach Readiness: Identify network risks and change risky employee behaviors to decrease the likelihood, and prepare for the possibility of, a data breach.
- 
ReportingMD® Total Outcomes Management (TOM): Manage your day-to-day clinical performance with this population health application and achieve superior outcomes for programs such as PQRS, HEDIS/STARS, ACO, 2017 MIPS and APM.
- 
Simplifeye Apple Watch and iPhone: Helps medical providers deliver a more personal patient experience, by providing quick view appointment details and patient information, as well patient ready notifications, so you can focus on delivering the best possible care experience to the patient in front of you.

“

*We chose MicroMD after using a couple of vendors' products. We like MicroMD PM + EMR for **its ease of use and speed**. The software allows us to enter and access clinical information quickly and easily - a critical function for our urgent care setting. The interface between the PM and EMR is seamless allowing for enhanced billing processes. We also utilize MedicScan to scan and import data from identification and insurance cards into MicroMD PM and are able to use a document scanner to scan lab and x-ray reports and attach them to patient records in the EMR. This functionality has allowed us to become a paperless office where we no longer create or manage paper charts.”*

- Dean Schear, CEO

Roswell Family Care - Roswell, NM
