Henry Schein MicroMD | SOLUTIONS

Integrated and standalone solutions that complement and add value to your MicroMD software.

Clinical Solutions

P **dashboardMD Analytics:** Extracts key financial and claims data from MicroMD PM to present real-time business intelligence dashboard tools and reporting for optimizing practice performance.

E **Dragon One:** Secure, cloud-based, clinical speech recognition tool integrated with MicroMD EMR that ensures providers can document completely, in their own words and with their own smart device, within their EMR software.
S **Henry Schein Rx Samples:** Providers simply and easily order samples of leading pharmaceutical drugs from their preferred devices in order to provider patients with free drug samples at their practices and avoid prescription abandonment.

E **Henry Schein Secure Chart Patient Portal:** Flexible, two-way patient-to-practice communications to allow medical professionals a way to interact with their patients to answer questions, collect or send information.

E **MicroMD CDS powered by Persivia:** Provides both prospective and retrospective clinical decision support in the form of real-time evidence-based alerts, guidelines, protocols, and reports that help clinicians improve quality measure scores, reduce costs and improve patient care.
E **MicroMD EPCS Gold:** Enables prescribers to legally write prescriptions for Schedule II through V drugs to retail or mail order pharmacies electronically and access PDMP data within the same EPCS workflow.

PE **MicroMD Patient Intake powered by Relatient:** Offers appealing patient-facing options, including online registration and form completion, digital signatures, insurance card and driver's license uploads, and reminders – all prior to the appointment.

S **MicroMD Virtual Video Visits powered by Medpod:** Offers a direct to patient video consultation service for practitioners that's fully browser-based for easy virtual consultations — anytime, anywhere.

E **Surescripts ePA:** Electronic prior authorization for prescriptions through Surescripts is a FREE tool built directly into MicroMD EMR that allows providers to quickly and easily gain authorization for prescriptions.

E **Surescripts Real-Time Prescription Benefits:** Available for FREE in MicroMD EMR, providers are enabled to provide their patients with price transparency for the specific pharmacy of their choosing before sending off their prescription.

E **Topaz eSignature Pad:** Enables paperless document creation, signing and authentication of electronic forms with digital handwritten signatures.

S **USARx:** Enable providers at your practice to help patients save money on costly medications with USARx discount and coupon program. There are over 60,000 pharmacies utilizing this program pushing us one step closer to medication adherence.

E **VisualDx:** Clinical decision support is made easy with this FREE tool integrated directly in MicroMD EMR to enhance accuracy of diagnosis, aid in decision making, and improve patient safety overall.

PE **Yosi Health:** Leveraging contemporary consumer smartphone behavior, Yosi Health is a pre-arrival focused, patient scheduling, intake and payment solution that integrates with MicroMD PM & EMR, eliminating wait times, improving patient experience and increasing financial results for clinical practices.
