HENRY SCHEIN®
expressChart EMR™
FOR PRIMARY CARE

Reclaim patient facetime.

Simplify Primary Care
clinical workflows.

Maximize profitability
with proven Practice Management software.

| Cloud primary care EMR to simplify and speed **clinical documentation**

Feeling burned out by the time, money, and training needed to properly use an EMR/EHR system?
If so, you're not alone.

Medscape surveyed 15,000 physicians revealed that 42% reported feeling stress due to EHR usage. Often that stress is related to extra data entry hours, too many clicks, and complex digital workflows, ultimately resulting in less facetime with patients. You don't have to be part of the 42%. **expressChart EMR**, specifically designed for primary care physicians, is a quick, easy, and cost-effective solution to ease the pain of EHR use and get providers back to the business of healing.

Fast, simple, intuitive charting
expressChart EMR charting is simple, fast, and intuitive, allowing you to spend more time with patients, less time on charting.

Established library of clinical content
Including encounter templates, health maintenance, and screening tools to speed provider adoption and documentation.

Easy onboarding and quick adoption
Intuitive implementation and training options enables provider proficiency and adoption of core workflow functions in minimal time.

Low cost monthly subscription
Powerful integrated PM & EMR software for a low monthly cost, including what you need to get started – quickly.

Integrated with powerful MicroMD Practice Management
Bundle expressChart EMR with integrated MicroMD PM to access a full-featured practice management software used by practices, RCM, and billing companies to maximize operational and financial efficiency and profitability.

2015 Edition CEHRT
expressChart EMR has enhanced 2015 Edition CEHRT functionality to make it easier for primary care physicians to maximize payment program participation.
