How the Henry Schein Medical Website Helps to **Standardize, Optimize, and Automate** Your Purchasing Experience

Standardize:

Custom eCatalogs

This function enables standardization by empowering administrators to restrict item access by user.

Reporting Portal

This function supports data standardization with trackable account insights and documentation.

Optimize:

Invoice Reconciliation

This function enables optimization for efficient shipment and invoice reconciliation.

Custom Order Messaging

This function helps optimize your accounts payable process with the addition of unique messages (e.g. GL Codes, etc.) on invoices and packing slips.

Automate:

Inventory Management

This function automates critical business data management, forecasting, and reporting with predictive purchasing tools to set desired par levels, suggested orders, quantities on-hand, etc.

Special Features

Henry Schein continually offers enhanced features with incremental web functionality to ease supply chain burdens!
