Yosi Health – Quick Start Guide

What is Yosi?

Yosi helps care centers generate **more revenue**, **reduce admin expenses**, and creates an exceptional **patient experience** by automating the patient registration process.

Our Goals!

1. **Easy solution to introduce to your clients** - Every one of them uses a clipboard for patient registration. Yosi makes the waiting rooms suck less.

2. **Aligned Incentives** - We recognize when you are successful is when we become successful. Incentives aligned to reward faster, larger deal closing

3. **Simple and easy to work with us** - We realize you are busy and we make it easy and simple to introduce your clients to us on the go. Simply have your clients schedule a meeting with this link: https://calendly.com/mikebaker/15min

How to Introduce Yosi Health

"Are you currently using clipboards for patient intake and registration?"

The answer invariably is Yes (all of us have filled out those clipboards)

"We are introducing a new patient intake and registration solution that is growing rapidly. They focus on getting patients to register at home before your patients arrive for the appointment.

They integrate with all the top EMR's and guarantee $45k in ROI per physician per year.

I recommend setting up a free 15 minute call"
