HENRY SCHEIN®

expressChart EMR™

FOR URGENT CARE

Reclaim patient facetime.
Chart urgent care patients in under 30 seconds

| Easy to implement cloud EMR for unique urgent care workflows and documentation

Continue building on the successful urgent care you envision.

We can help you get you focus on what matters most - healing and engaging your patients so they continue to choose your urgent care and maximizing revenue for the work you and your team do.

Henry Schein expressChart EMR for Urgent Care is a cloud EMR that meets the unique workflow, documentation, and revenue needs of fast-paced urgent care environments. And, paired with the flexibility and control of MicroMD Practice Management software, your billing team has full control of your accounts receivables, ensuring every dollar generated is retained by your urgent care – not outsourced to a 3rd party for a hefty fee.

Fast, simple, intuitive charting
Complete a chart in under 30 seconds using prompts and built-in intelligence to rapidly move through charts, while insuring comprehensive care.

Clinical productivity analytics
Performance metrics provide data to support business and clinical decision-making. Complete data capture facilitates quality care and allows for improved operational and provider performance using KPIs.

Easy onboarding and quick adoption
Intuitive implementation and training options enables provider proficiency and adoption of core workflow functions in minimal time.

Low cost monthly subscription
Powerful integrated PM & EMR software for a low monthly cost, including what you need to get started – quickly.

Integrated with powerful MicroMD Practice Management
Bundle expressChart EMR with integrated MicroMD PM to access a full-featured PM software used by practices, RCM, and billing companies to maximize operational and financial efficiency and profitability.

2015 Edition CEHRT
expressChart EMR has enhanced 2015 Edition CEHRT functionality to make it easier for urgent care physicians to maximize payment program participation.
