

Remote Patient Monitoring, Simplified

Carium enables Remote Patient Monitoring (RPM) with a preconfigured combination of software and services that puts provider organizations on the fast track to reimbursement and more patient-centric, collaborative care models.

Our pre-configured on-ramp package makes it easy to get started with your top priority use case or condition — then expand from there.

Carium gets partners successfully launched and eligible for reimbursement of up to \$123 per patient per month in as little as a few weeks. And you can use our platform simultaneously for Chronic Care Management (CCM)/ Principal Care Management (PCM), and Virtual Visits.

Applicable CPT codes: 99453, 99454, 99457, 99458

The Tech

Carium's software platform connects patients, providers, and remote monitoring devices so collaborative care can happen anywhere. Our time tracking dashboards and digital devices make providing care and getting reimbursement easy.

Connected Devices

The Services

Carium helps you deliver team-based virtual care that maximizes the efficiency of your clinical team and the health impact for your patients.

Custom Configuration. Our software features are preconfigured to include everything providers and patients need for RPM.

Clinical Transformation Expertise. Expert support configuring work streams, and maximizing your clinical efficacy for RPM.

Dedicated Support. Our strategic and day-to-day account managers support your success.

Patient Engagement Expertise. Our experts help you recruit, enroll, and engage patients based on best practices for RPM and behavior change science.

Angela Stevens, RN BSN
Founder
Health Logx, LLC

RPM has been a game changer in managing patients' chronic conditions. I can't imagine going back to the traditional practice of delivering episodic chronic care management.

”

Arwin Soetanto
CEO
Lifestyle Medical

Implementation was seamless. The provider portal is very intuitive, and our care staff was fully operational with minimal training.

”

Funding Your Digital Transformation

Carium enables **Remote Patient Monitoring** (RPM), **Chronic Care Management** (CCM), and **Principal Care Management** (PCM) with a pre-configured combination of software and services that puts provider organizations on the fast track to reimbursement and more patient-centric, collaborative care models.

Generate new sources of revenue by caring for existing and new patients virtually. Tap into multiple CMS reimbursement programs and other funding opportunities to match your patients' needs.
