

SprayGuard Surface Protection Service¹

As a healthcare provider, you place a priority on protecting the health and wellbeing of the people in your care. Infection control plays an increasingly important role. While running your practice you must also make sure you remain vigilant in reducing the presence of viruses and bacteria on surfaces that may put your patients at risk.

Introducing SprayGuard Surface Protection service providing you with peace of mind knowing that the surfaces in your practice have been cleaned and disinfected to kill viruses, bacteria, and germs, followed by the application of a product to provide long-term surface protection against odor & stain causing bacteria, mold, mildew and fungi for up to 90 days. With SprayGuard Surface Protection, you know you’ve gone the extra mile to keep your practice clean. Your patients will know it too.

SprayGuard Surface Protection Service

HOW IT WORKS

Our highly trained technicians will come to your practice to:

1

Clean high-touch surfaces to remove soil and debris

2

Treat surfaces with a registered disinfectant using an electrostatic sprayer

3

Protect surfaces with an antimicrobial preservative

Within a few hours, your practice will be disinfected, protected and ready to welcome patients with confidence⁵. Surfaces will be disinfected against viruses², bacteria and germs, and treated with a product that residually inhibits the growth of bacteria³, mold, mildew, fungi and algae for up to 90 days.

The HealthFirst EPIC Program:
Choose the Plan that Fits You

Enjoy even greater peace of mind with the HealthFirst EPIC (Effective Practice Infection Control) Program. With your choice of plans and a host of value-added features, you’ll be able to take your infection control and patient confidence to the next level.

Get Started Your Way ►

PREVENTION WHEN YOU WANT IT

Our Preventive Plan offers savings on one-time purchases of the SprayGuard Surface Protection Service.

CONTINUOUS PREVENTION AND CONVENIENCE

Select the Continuous Prevention annual subscription plan for even more savings. Keep your practice protected with a quarterly service so you can be assured your practice is protected throughout the year.

Rely on the Latest Surface Disinfecting Science

As part of your SprayGuard Surface Protection service, our highly trained technicians use the latest innovations in infection control and surface disinfection⁴.

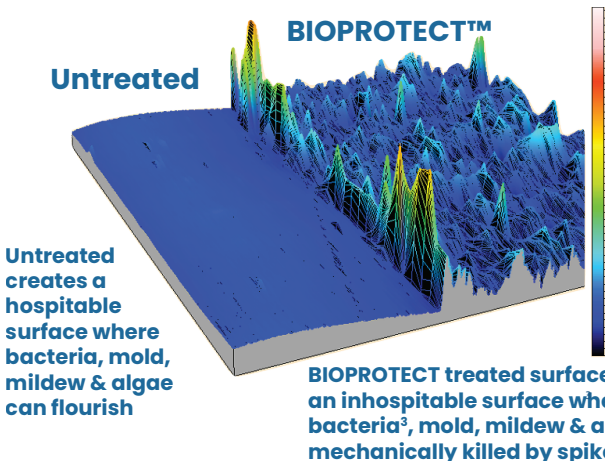

SmartTouch® Disinfectant

A registered disinfectant, SmartTouch® uses a unique chemical formula that is non-irritating to skin and noncorrosive to surfaces. SmartTouch® is a broad spectrum disinfectant that penetrates porous and non-porous surfaces that eliminates 99.9% of bacteria³, germs, and viruses².

BIOPROTECT™ RTU: Patented Antimicrobial Residual Surface Protection

Using patented technology, BIOPROTECT™ RTU modifies surfaces to create a protective antimicrobial barrier that residually inhibits the growth of bacteria³, mold, mildew, fungi and algae for up to 90 days.

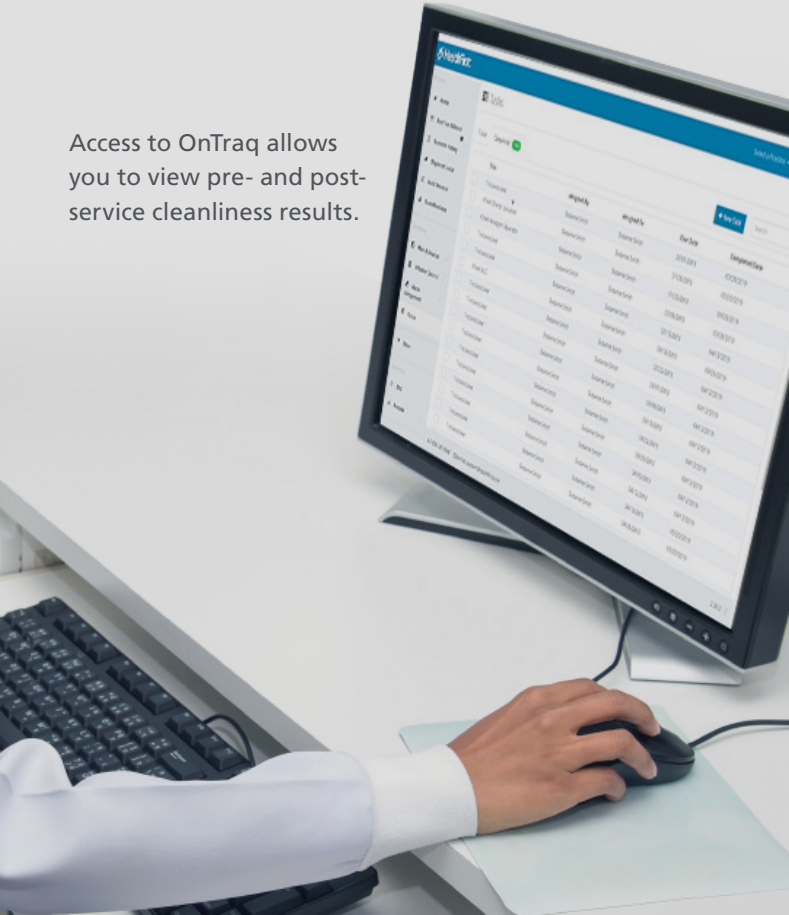

- A covalent bond is formed with the surface, creating a durable antimicrobial coating.
- The coating generates a shield of spikes, each carrying a positive charge that attracts negatively charged microorganisms³.
- The spikes pierce the cell and rupture its membrane, causing the microorganism³ to die on contact.

Insight with OnTraQ™

Your SprayGuard Surface Protection service comes with access to OnTraQ, our leading-edge software platform that gives you visibility into your infection control success.

Access to OnTraQ allows you to view pre- and post-service cleanliness results.

⁵ The practice must continue to perform its standard cleaning and disinfecting protocol The SprayGuard Surface Protection Service is not a substitute for the standard infection control protocol

DID YOU KNOW?

COVID-19 is caused by SARS-CoV-2. SmartTouch® Disinfectant kills similar viruses and therefore can be used against SARS-CoV-2 when used in accordance with the directions for use against Adenovirus 1 (ATCC VR-1), Canine Adenovirus 1 (ATCC-VR293), and Canine Parvovirus (ATCC VR-2016) on hard, non-porous surfaces. Refer to the CDC website at <https://www.cdc.gov/coronavirus/2019-ncov/index.html> for additional information.

EPA Registration No. 82972-1-88566

About HealthFirst®

A leading authority in practice preparedness, HealthFirst partners with care providers to optimize infection control management, ensuring safety as the foundation for everyone. Our broad portfolio of products and services meet the specific infection control needs of our clients. Through innovative technology-driven solutions, including our OnTraq software platform, we provide the visibility, simplicity and efficiencies practices and businesses need to protect their environments and people while conserving costs, time and resources.
