

Continuous Air Purification for Your Facility.

ActivePure® Beyond Guardian Provided by HealthFirst®

The ActivePure Beyond Guardian is designed to work in any indoor space with accessible electrical power. Once plugged in and powered on, it continuously and efficiently purifies the air of the targeted area. Each unit covers 1,000-2,000 square feet.

Units should be placed on the floor, and in a location away from the HVAC return duct, if applicable. The rear of the unit requires six inches of an open area to allow unrestricted airflow.

Features & Benefits

- ActivePure Technology is safe for use in spaces occupied by people and pets
- Provides continuous air purification in real-time 24/7
- Combines multiple complementary technologies, including positive and negative multipoint and RF ion generation and activated carbon
- Reduces airborne contaminants and allergens
- Plug and play portable solution with no installation required, low maintenance and light weight
- Coverage for 1,000 - 2,000 square feet
- Energy efficient
- Directed air circulation
- Filter Replacement every six months
- Cell Replacement every 12 months
- 34 pounds

How it Works

- ActivePure Technology uses light waves and a catalytic process to produce super oxide molecules and hydro-peroxides that destroy contaminants in the air
- Advanced ActivePure Technology continuously disinfects the air

Can Be Used in Any Indoor Space
