

Continuous Air Purification for Your Facility.

ActivePure® Medical Guardian¹, Healthcare Inspired, Science Provided by HealthFirst®

The ActivePure Medical Guardian¹ is a Class II Medical Device designed to work in any indoor healthcare space with accessible electrical power. Once plugged in and powered on, it continuously and efficiently purifies the air in the targeted area and each unit covers 3,000 cubic feet.

Units should be placed on the floor, and in a location away from the HVAC return duct, if applicable. The rear of the unit requires six inches of an open area to allow unrestricted airflow.

Features & Benefits

- ActivePure Technology is safe for use in spaces occupied by people and pets
- Provides continuous air purification in real-time 24/7
- Class II Medical Device¹
- Combines multiple complementary technologies, including positive and negative multipoint and RF ion generation and activated carbon
- Plug and play portable solution with no installation required, low maintenance
- Coverage for 3,000 cubic feet
- Energy efficient
- Directed air circulation
- Cell replacement every 12 months
- Filter replacement every six month
- 48 pounds

How it Works

- ActivePure Technology uses light waves and a catalytic process to produce super oxide molecules and hydro-peroxides that destroy contaminants in the air
- Advanced ActivePure PCO Technology continuously protects and purifies the environment

Can Be Used in Any Indoor Space

¹ Although Medical Guardian ActivePure has been cleared by FDA for medical purposes, it is not expressly FDA cleared or approved to kill SARS-CoV-2. It is intended to be effective at killing SARS-CoV-2 based on demonstrated effectiveness against viruses that are similar to SARS-CoV-2 (e.g., MS2 bacteriophage RNA virus) and pathogens that are harder to kill (e.g., erwinia herbicola), and it is being marketed for that use in accordance with an FDA enforcement policy.
