Billing for Qr8 Brain Vital Sign™

Billing Guidance by Visit	CPT Code	Description	Estimated Billing*
Initial Visit	96138	In-person neuropsychological test administration, first 30 min	\$41
If Flagged	96138	In-person neuropsychological test administration, first 30 min	\$41
	+	+	+
	96132	Neuropsychological testing evaluation by health care professional, first 60 min	\$188
If Diagnosed	99483	Cognitive care planning, separate visit	\$364

Billing for Qr8 Brain Vital Sign™ assessments may include time spent administering the test, reviewing the results, interpretation, report writing, and discussing the results with the patient and/or family. If this process occurs over several days, the time should be combined and reported on the last day of service.

*Reimbursement rates are based on Medicare and adjusted based on insurance mix (from survey results) and private payer reimbursement (proprietary knowledge)
