

# Why Our Users Love Our Platform! \*

**25%**  
Time Savings

## AP AUTOMATION

Our AI-powered platform is so efficient it is saving AP users as much as 25% of their time each week by streamlining the reconciliation of invoices. Just by adding the 3-way match, users can get up to 3% of their invoice spend back.

### The Value of Automation

	Without automation	With automation
Processing cost per invoice (avg.)	\$13.11	\$1.00 – 2.00
Annual invoice processing capacity (avg.)	6,000	22,000

## PROCUREMENT

Because of the way our platform simplifies, streamlines, and consolidates the procurement workflow, materials and operations managers are reporting that the time they spend resolving invoices has been reduced by up to 50% on our platform.

**50%**  
Faster invoice  
resolution

**\$100,000+**  
Annual cost reduction

## DATA MANAGEMENT

Because our platform ensures clean data in the item master and global product catalog, users are reporting annual savings of \$100,000 or more due to the elimination of bad data and the time required to manage it.

## INVENTORY

The ability to track periodic physical counts as part of our procurement and payment functionality allows an unprecedented amount of insight and management control for non-acute health care facilities.

**25%**  
Savings on  
wasted inventory

**10-20%**  
Reduction in spend

## REPORTS

The combination of procure and payment in one platform allows us to generate comprehensive reports that empower users to identify trends and connections they may not have otherwise seen. By paying attention to the spend, an organization will typically save 10% - 20% by viewing and understanding their data at a deeper level.
